

Technical data sheet

Type: KINGWON NO.273008
Transferprinting felts

Description

- Endless needled felt made from high temperature-resistant meta-aramid fibres
- Operating temperature: 230°C, short term up to 250°C
- Each felt is individually produced, depending on the intended application
- Our felts has circular industrial fabric, Can achieve ultra-low shrinkage

Technical data

Material	100% nomex
Density	2200g/m2~4400g/m2
Thickness	6mm~12mm
Width	600mm~3800mm,OEM
Inner circumference	1200mm~30000mm,OEM
Thermal shrinkage	≤1%
Work temperature	200°C~260°C
Working life	4000 hours
Packing	Plastic film,Cushion,Woven bag.
Lead time	Within 15 days after deposit
